- Developing & Delivering Training

Clinical & Professional Experience

Anne has over 40 years of experience in occupational therapy, vocational rehabilitation and occupational health. She is a highly competent clinician and educator with clinical expertise in hand and upper limb evaluation and rehabilitation, orthopaedic trauma, musculoskeletal injury / condition management and burns, gained while working in Canada and the UK.

Anne is an accredited functional capacity evaluator and trainer and has also completed postgraduate training in Occupational Ergonomics and Job Analysis at the University of Michigan (USA).

Anne was instrumental in developing and subsequently managing a highly successful multi-disciplinary Employee Rehab Unit in Toronto, which was proven to reduce costs and lost days. Anne returned to the UK and worked in Employee Health Services at Royal Mail establishing a role for Occupational Therapy in OH.

Anne is a trainer in FCE, and has lectured and provided training in ergonomics, job analysis, occupational therapy, anatomy and injury

management in OH/VR as a guest lecturer at various universities and as a presenter at international and national conferences.

Anne is the founder of Obair and is responsible for clinical governance and programme/service development. She provides on-going clinical guidance and support to the team and remains clinically current by continuing to carry an active caseload.
