Base: Oxford

Areas Covered: Midlands, South West, South East

Specialisms

Spinal Cord Trauma

Complex Orthopaedic Trauma

Acquired Brain Injury

Injury Expertise

- Acquired Brain Injury (Complex)
- Spinal Cord Injury
- Functional Neurological Disorder
- Orthopaedic Injuries

Clinical Experience

- Bryony qualified as a Physiotherapist in 2017 and has extensive NHS experience in both community and hospital settings. She is a specialist in neurorehabilitation, working with acquired brain injury, spinal cord injury, stroke, and complex neurological disorders.
- She is used to communicating and liaising with various members of the multi-disciplinary team to ensure successful, appropriate and timely outcomes for her clients.
- Bryony has also worked in the community providing orthopaedic rehabilitation to clients after accidents and injury, as well as planned and unplanned surgeries, to support their return to function.

Rehabilitation Expertise

Rehabilitation Management

- Bryony is experienced in working as a specialist physiotherapist within multi-disciplinary teams, for patients with complex neurological rehabilitation needs, in both community and outpatient hospital settings.
- She has designed and set up a triage system for specialist neurological rehabilitation outpatient services, in order to manage complex patients in a timely manner.

- Bryony also has experience in creating and implementing comprehensive exercise programmes, spasticity assessment and management, posture management, splinting, and fatigue management.
- Prior to working as a physiotherapist, Bryony had experience of working as a support worker for clients with catastrophic injuries and their families. She is skilled at implementing and planning ongoing care and support for the client, whilst engaging and communicating with family members and the wider support network.

Vocational Rehabilitation

- Using her knowledge of recovery and rehabilitation at all stages, from acute to chronic, Bryony focuses on a biopsychosocial and client centred approach, using functional measurable goals and achievable targets to monitor progress and maintain engagement.

CPD & Training

- Saebo Glove Training
- Complete Musculoskeletal Outpatients Course
- Queens Square Upper Limb Rehabilitation Course
- Functional Neurological Disorder Course
- 24 Postural Management & Wheelchair Postural Assessment for Adults & Children with Disabilities

Memberships & Qualifications
