Base: Northamptonshire

Areas Covered: London, South East, Midlands

Specialisms

Spinal Cord Injury

Traumatic Brain Injury

Neurological Conditions

Injury Expertise

- Spinal Cord Injury (Complete & Incomplete)
- Acquired & Traumatic Brain Injury (Mild & Moderate)
- Psychological Trauma & Mental Health
- Learning Disabilities (Adults & Children)
- Cerebral Palsy

Clinical Experience

- Liz qualified as a Registered Learning Disability Nurse in 2009 working in the NHS and private sector.
- For twelve years Liz worked in complex care, including recent clinical practice assessing those with complex health conditions. This involved client needs, implementing risk and management plans (with recruiting and training bespoke teams of carers), providing specialist clinical training in spinal injuries, brain injuries and other neurological conditions.
- Liz is experienced in working with the wider multidisciplinary team including physiotherapists, occupational therapists, dieticians, Speech and Language Therapists, GPs and nurses.
- As a nurse, Liz has supported those with Traumatic Brain Injuries to be independent in their own home.
- Liz has supported with CQC inspections and led clinical governance and auditing.
- Liz is experienced in assessing people with Autism, learning disabilities and mental health needs in a variety of hospital settings.

Rehabilitation Expertise

Rehabilitation Management

- Liz's areas of clinical expertise lie with spinal cord injury at levels cervical, thoracic, complete and incomplete.

- She has in-depth knowledge of bowel management with spinal cord injuries, and autonomic dysreflexia.
- Her considerable experience extends to working with brain injury clients and those with complex neurological conditions.
- Liz is skilled at working with community and care teams for clients with spinal cord injuries, brain injuries and other neurological conditions.

Vocational Rehabilitation

- Liz has supported children in Special Educational Schools to sustain their educational needs.
- Liz applies a biopsychosocial approach, taking into consideration the physiology of the underlying injury, in addition to addressing psychological and social contextual factors. This approach promotes independence with clients in the community.
- She uses a client centred approach with goal setting to engage and motivate clients.
- Liz has worked with complex clients where vocational rehabilitation may not be appropriate and has supported with the engagement of meaningful activities to provide structure and purpose to the individual's day.

CPD & Training

- Spinal Cord Injury – SIA
- Invasive Ventilation
- Understanding Trauma

Memberships & Qualifications

- DipHE Registered Nurse Learning Disabilities
- Member of CMSUK, BABCIM, NMC & RCN
