

## Clyde Crawford

Rehabilitation Manager

Base: South Wales

Areas Covered: Wales, South West, Midlands

### Specialisms

Musculoskeletal

Complex Orthopaedic & Trauma

Vocational & Return to Work

### Injury Expertise

- Complex Musculoskeletal
- Acquired Brain Injury (Mild/Moderate)
- Psychological
- Neurophysiological

### Clinical Experience

- Clyde is an experienced physiotherapist with over 20 years of clinical expertise. He has worked in a variety of clinical and rehabilitation settings where he has rehabilitated patients with a variety of injuries, from complex traumatic orthopaedic injuries to neurophysiological injuries.
- In his recent clinical work, Clyde worked as an Occupational Health Physiotherapist. In this hands-on role, he used clinical and therapeutic skills to assess and treat injuries and to develop rehabilitation plans to assist towards a safe and sustainable return to work.
- Clyde has a keen interest in the psychological impact of injury and ill health and is experienced in working with patients who have experienced adverse psychological reactions that are impacting their recovery from injury.

### Rehabilitation Expertise

#### Rehabilitation Management

- Clyde has significant case management experience, working with adults who have multi-trauma conditions spanning a range of orthopaedic and psychological injuries.
- He has excellent knowledge of treatment pathways in the UK for both NHS and private pathways.
- He is skilled in developing and co-ordinating multi-disciplinary rehabilitation programmes in community and hospital settings, enabling effective outcomes when working towards client goals.

### Vocational Rehabilitation

- Clyde has vast experience of working in clinical occupational health roles. In these roles, he provided hands-on clinical return to work assessments to assist patients in returning to suitable employment. He is adept at providing support to claimants and employees to support a safe and sustainable return to work.
- He applies a biopsychosocial approach, taking into consideration the biology or physiology of the underlying injury, in addition to addressing psychological and social contextual factors. This approach promotes independence and is supportive of a return to work.

### CPD & Training

- Functional Capacity Evaluation
- Exercise Assessment & Prescription
- Safeguarding Training
- Introduction to Case Management
- Flags Biopsychosocial Model
- Mental Health Training (depression, anxiety and suicide)
- Motivational Interviewing

### Memberships & Qualifications
