

Nicole Slater

Rehabilitation Manager

Base: Manchester

Areas Covered: North West, North East, Wales

Specialisms

Spinal Cord Injury

Traumatic Brain Injury (Complex)

Children & Young People

Injury Expertise

- Complex Orthopaedic Injuries
- Neurological Injuries
- Psychological Injuries

Clinical Experience

- Nicole is a Registered Adult Nurse with experience coordinating complex rehabilitation and clinical care for people with acquired or traumatic brain injury, spinal injury, neurological conditions, polytrauma, musculoskeletal injury and long-term complex needs.
- She qualified as a Registered Adult Nurse rehabilitation support to critically ill patients including ventilated and sedated patients and those requiring haemofiltration, vasopressor support and enteral nutrition.
- Nicole is experienced in community rehabilitation for patients following spinal injury, TBI and life-limiting neurological conditions. She has significant experience working with multidisciplinary teams and commissioners to establish safe, clinically appropriate care in the patient's own home.

Rehabilitation Expertise

Rehabilitation Management

- As a Rehabilitation Manager since 2021, Nicole manages clients with complex needs, coordinating assessment, treatment planning, service provision and ongoing review to support safe, effective and goal-focused recovery.
- She develops evidence-based rehabilitation plans with measurable goals, defined outcomes and regular review points, and monitors progress through clear professional reporting.

- Nicole coordinates multidisciplinary input across medical, therapy, vocational, social care and community services to support integrated care delivery. This includes setting up complex care packages, equipment, housing, benefits and social reintegration, while managing rehabilitation resources and budgets responsibly to maintain quality, safety and value.

Vocational Rehabilitation

- Nicole is passionate about supporting vocational rehabilitation and return-to-work planning based on functional ability, risk, sustainability and the client's own goals.
- She applies a biopsychosocial approach, taking into consideration the biology or physiology of the underlying injury, in addition to addressing psychological and social contextual factors. This approach promotes independence and is supportive of a return to work.

CPD & Training

- SIA: Clinical Excellence in the Care of Spinal Injured Patients
- Tracheostomy Care; Ventilation: BiPAP & Cough Assist Training; Enteral Pump Feeding; Epilepsy Management
- Better Together: Working Collaboratively with Families
- Life of P: Case Management over the Lifespan from Child to Adult with ABI/TBI
- Safeguarding Level 3

Memberships & Qualifications

- BSc (Hons) Nursing (Adult)
- Registered with NMC, IRCM & BABICM
- Member of CMSUK & VRA
